

Tooth Gem Waiver Form

Name: _____ Date: _____

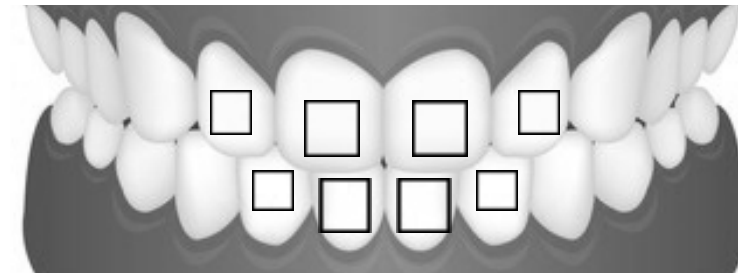

DOB: _____ Phone: _____

Address: _____

City: _____ State: _____ Zip: _____

Emergency Contact Name/Number: _____

- Do you have any allergies to dental materials? (YES) (NO) If so, what _____
- Is the tooth you want the gem on REAL (not false, crowned, or capped)? (YES) (NO)
- Do you have sensitive teeth? (YES) (NO)
- I authorize _____, to apply a tooth gem with dental adhesive to the checked tooth/teeth below, and I certify that the tooth/teeth checked are real. Client initials: _____

Tooth Gem Placement: Gems must be placed on a real, flat tooth. Gems also must be placed high on the tooth, or in the center, as the low part of the tooth is what sinks into food when biting.

General Information/Care: Tooth gems are non-invasive; they do not damage the tooth/enamel and are semi-permanent. The adhesive is the same that is used to apply braces. The tooth jewels used are 100% real Swarovski crystals, which are lead free. Once the gem is on, there may be some dental adhesive surrounding the area. This is normal, and it will wear off within a few weeks from normal brushing and eating. Tooth gems can last anywhere from two months to a year. If you are ready to remove the gem before it naturally falls off, visit a dental professional to have it removed. Do NOT try to remove the gem yourself.

Tooth Gem Replacement Guarantee: If your tooth gem falls off within two months of us applying it, you may come in and we'll be happy to apply a replacement. We can only apply a replacement gem once.

Agreement: I understand that Zink Modern Tattoo and its employees are not responsible for any damage done to my tooth/teeth during or after the tooth gem procedure.
